

Deliverable title	D2.5 Establishment of a stakeholder platform for knowledge exchange network
Deliverable Lead:	UNIVPM
Related Work Package:	WP2- Multi-actor internal and external communication and technology transfer
Related Task:	T2.2 Establishment of a stakeholder-platform and knowledge exchange network (month 1–36)
Author(s)	Lucia Aquilanti
Dissemination level	PU
Due Submission Date:	30.11.2022
Actual submission:	30.11.2022
Start date of project	30.05.2022
Duration	36 months
Summary of Deliverable D2.5 – Establishment of a Stakeholder Platform for Knowledge Exchange Network	<p>The platform brings together a diverse community of stakeholders from all five partner countries, including crop producers, organic associations, food industries, research institutions, consultants, banks, certification bodies, NGOs, and public authorities. Care was taken to promote inclusiveness and gender balance, ensuring that small farms, entrepreneurs, and women-led initiatives are equally represented. By doing so, the consortium built a network that reflects the Mediterranean's socio-economic richness.</p> <p>Stakeholders were invited to participate voluntarily, with opportunities to share ideas, experiences, and expectations. The platform is supported by practical tools such as multilingual surveys, available in Arabic, Croatian, English, French, Italian, and Turkish, which allow stakeholders to contribute directly to shaping research priorities and food product development. In return, members receive updates through newsletters, reports, and workshops, keeping them engaged and informed.</p> <p>This approach transforms the project from a closed research effort into a collaborative innovation ecosystem. Farmers and companies can influence the direction of trials and product development, while researchers ensure their work is grounded in real-world needs. The platform also lays the foundation for long-term knowledge exchange beyond the project's duration.</p>

The PRIMA programme is an Art. 185 initiative supported and funded under Horizon 2020, the European Union's Framework Programme for Research and Innovation'

2. Implementation of collaborative and facilitated surveys for stakeholders

Whenever possible, multi-language surveys were prepared for the stakeholders. An example of a collaborative and facilitated exchange of knowledge is given by the implementation of surveys to include the stakeholders during the research activities of WP5 (discussed in WP5). Surveys were prepared in 6 languages: ARAB, CROATIAN, ENGLISH, FRENCH, ITALIAN and TURKISH, following the countries involved in the Project. Surveys are available online on the site of SEAFENNEL4MED as indicated by the blue arrow and accessible in different languages to avoid language limits in exchanging knowledge.
